NINJAS STEM FOUNDATION

Non-Discrimination & Equal Opportunity Statement

POLICY ID NSF-ND-01 | STATUS Proposed for Board approval | EFFECTIVE DATE _____

Our Commitment

Ninjas STEM Foundation is committed to providing meaningful educational opportunities in robotics, engineering, programming, and related STEM fields.

NSF welcomes students and community participants from diverse backgrounds and seeks to maintain an inclusive, respectful, and supportive learning environment.

Fair Access

The Foundation does not discriminate in its educational programs or organizational activities on the basis of race, color, national origin, ethnicity, ancestry, religion, sex, disability, or other characteristic protected by applicable law.

As a matter of Foundation policy, selection and participation decisions shall also be free from inappropriate personal favoritism, including preferential treatment based on parental donations, fundraising activity, or organizational position.

Educational Eligibility and Program Capacity

Admission to a particular competitive robotics team or other program may depend on legitimate educational and operational criteria, including age or grade eligibility, student interest, program readiness, attendance commitments, available supervision, safety, equipment, and capacity.

These requirements shall be disclosed and applied consistently.

NSF does not guarantee admission, renewal, a particular student assignment, or equal competition roles regardless of individual readiness or program needs.

Accessibility and Accommodations

NSF will consider reasonable accommodation and accessibility requests in accordance with applicable law and the circumstances of the program.

Students and families are encouraged to communicate relevant support needs through the Foundation's designated contact.

Requests shall be considered individually, respectfully, and with appropriate protection of sensitive information.

Fair Evaluation and Student Development

Students shall be evaluated using relevant educational criteria and actual evidence of their work, learning, preparation, teamwork, and readiness.

The Foundation values learning and growth, including participation by students who are new to robotics.

Good-faith complaints, lawful reports, and decisions not to make voluntary donations shall not independently be used against a student in admission, evaluation, renewal, or participation decisions.

Concerns and Review

Anyone who believes this Statement has not been followed may submit a concern through the Foundation's official contact channel or to an appropriately designated unconflicted Board representative.

The Foundation will review concerns fairly and prohibit retaliation for good-faith reporting.

This Statement shall be implemented through NSF's Student Participation Policy, Code of Conduct, Youth Protection & Safety Policy, and other applicable procedures.
