Team Mentorship Intake Form

Robotics Team Mentorship Program

Purpose: This form helps Ninjas STEM Foundation ("NSF") understand the experience, needs, goals, and availability of an independent robotics team seeking educational mentorship. Submission is a request for review, not program approval or an agreement to change the team's organizational affiliation.

Administrative note: The completed intake is for NSF program review and is not for public posting. Do not include medical details, student personal contact information, or other sensitive student records unless separately and securely requested.

01 Team Information

Team / Group Name | **City / Region**

Robotics Program: ☐ VEX IQ Robotics Competition (VIQRC) ☐ VEX V5 Robotics Competition (V5RC)
☐ Other: _____

Division: ☐ Elementary School ☐ Middle School ☐ High School

School / Organization, if applicable

Primary Meeting Location

Number of Current Student Team Members | **Approximate Grade Levels / Ages** | **Number of Seasons in VEX**

02 Primary Adult Contact

Primary Coach / Responsible Adult | **Relationship to Team**

Email | **Phone**

Preferred Method of Communication: ☐ Email ☐ Text / Group Messaging
☐ Other: _____

03 Current Team Experience

Please briefly describe the team's current experience and status.

Robot design/building experience:

Programming experience:

Driving / skills practice experience:

Engineering notebook experience:

Competition experience, if any:

Judging / team interview experience, if any:

Mentorship Needs & Scheduling

04 Areas Where Mentorship Is Requested

Please check all areas where your team would like educational guidance.

- ☐ Understanding the current VEX game and rules
- ☐ Robot design concepts
- ☐ Programming fundamentals
- ☐ Sensors and autonomous programming
- ☐ Driver practice and skills-development methods
- ☐ Competition preparation
- ☐ Judging / team interview preparation
- ☐ Project planning / time management
- ☐ Engineering design process
- ☐ Mechanical construction techniques
- ☐ Programming troubleshooting / debugging
- ☐ Robot testing and performance evaluation
- ☐ Engineering notebook organization and documentation
- ☐ Robot inspection preparation
- ☐ Team organization and student roles
- ☐ Other: _____

05 Current Challenges

What are the three most important challenges your team would currently like help addressing?

1.

2.

3.

06 Mentorship Goals

What would you like your students to be able to do more independently as a result of this mentorship?

Are there any particular skills or concepts that you would like students to learn?

07 Upcoming Events and Timing

Next scheduled competition, if applicable:

Date **Event**

Other important deadlines or events

Preferred mentorship frequency:

- ☐ One-time consultation
- ☐ Approximately twice per month
- ☐ Other: _____
- ☐ Approximately once per month
- ☐ More frequently before a competition, as mutually arranged

Preferred format:

- ☐ In-person at the team's normal meeting location
- ☐ Virtual session
- ☐ Other: _____
- ☐ In-person at an NSF-approved location
- ☐ Combination

Typical team meeting day/time

Acknowledgments & Submission

08 Student-Centered Mentorship Acknowledgment

NSF's mentorship program is intended to teach students how to solve problems independently, rather than provide completed competition solutions.

By participating in the program, the team understands that NSF mentors may teach concepts, demonstrate general techniques, ask questions, review student work, provide feedback, and help students develop troubleshooting and engineering skills.

NSF mentors are not expected to design or build the team's competition robot, write the team's competition code, prepare engineering notebook entries for students, or make competition strategy decisions on behalf of the team.

The mentored team's students remain responsible for their own design, construction, programming, documentation, strategy, and competition decisions.

☐ **I understand and agree with this student-centered mentorship approach.**

09 Team Responsibility

The participating team remains independently operated under its own Primary Coach or responsible adult unless a separate written and authorized organizational arrangement is made.

The team's Primary Coach remains responsible for:

- supervision of the team's students;
- compliance with applicable applicable competition and youth-protection requirements;
- student conduct and safety; and
- team registration and competition participation;
- parent/guardian permissions applicable to the team's students;
- decisions concerning the team's own competition activities.

Mentorship is educational and does not guarantee competition results, awards, qualification, funding, admission to an NSF team, or any particular outcome.

☐ **I understand and acknowledge these responsibilities.**

10 Additional Information

Is there anything else that would help NSF understand your team or provide more effective mentorship?

Submitted By

Name	Role / Relationship to Team
