NINJAS STEM FOUNDATION

Community Event Hosting Guidelines

For libraries, schools, PTAs, recreation centers, and community organizations

Policy ID	Approval status	Effective date
NSF-CP-04	Proposed; not adopted	To be established

1. About the program

NSF delivers age-appropriate, student-centered robotics and STEM experiences in partnership with qualified community hosts. Programs may include brief robot demonstrations, hands-on Build–Code–Drive workshops, Family Robotics Nights, STEM showcase booths, or other separately approved activities.

Each request is reviewed according to available volunteers, instructional fit, student safety, access needs, equipment, venue suitability, and the Foundation's schedule. Submission of a request does not guarantee an event or create a binding commitment.

2. Available formats

Format	Typical experience (illustrative)	Final scope
Robotics Discovery Demo	Student-guided demonstration, Q&A and explanation of robots/engineering concepts.	Age group, duration and audience agreed with host.
Build, Code & Drive	Rotating hands-on building, coding, driving or design stations.	Station equipment, adult supervision and capacity agreed.
Family Robotics Night	Short-format learning stations for children and accompanying families.	Staffing, room layout, guardian presence and participant flow agreed.
STEM Showcase / Booth	Drop-in demonstrations and student discussions at a fair or festival.	Booth rules, crowd management, public access and media rules agreed.

3. Request and decision process

A host should submit the organization name, contact and role, desired activity, date window, venue, student ages, expected attendance, desired learning outcomes, space and power details, accessibility considerations, and any rules applying to outside presenters.

An authorized NSF Event Lead reviews feasibility with the relevant coach, supervising adults, program lead and, as appropriate, the Outreach Committee. A proposal is not final until the authorized representatives of NSF and the host confirm the material arrangements in writing. No volunteer may promise the event, an expenditure, sponsorship benefit or contract beyond a valid delegation.

4. Host responsibilities and NSF responsibilities

Host should confirm	NSF should confirm
Address, accessible space, room capacity, permissible activities, facilities and event access	Program learning objectives, final activity plan, equipment and instructional materials
Registration procedures, attendance limits and responsible site personnel	Named NSF Event Lead, role-qualified adults and student mentors
Emergency procedures, facility rules, permission to operate/photograph, and any screening rules	Youth-safety plan, equipment checklist, incident escalation and applicable competition rules
Promotion and authorized use of host name/logo, cancellations and notice contact	Correct program description, permission-checked publicity, media boundaries and approved budget

5. Safeguarding and parental participation

NSF and the host shall identify who is responsible for checking participants in and out, supervising minors, handling emergencies, screening adults, obtaining permissions, and maintaining applicable attendance records. Responsibility shall be explicit; it is not determined merely by who owns the venue.

Public demos and accompanied family events may require different supervision than drop-off instruction. If a program resembles childcare, an extended camp, or an activity involving specialized equipment, the parties shall review relevant regulatory requirements before opening registration. NSF's own Youth Protection & Safety Policy and any applicable host requirements both apply.

6. Venue, equipment and cancellation terms

Hosts should provide reasonably safe and suitable space, tables or barriers where necessary, any agreed electrical supply, and adult access to emergency exits. NSF brings only the equipment, supplies and staffing stated in the confirmed arrangement.

Activities may be postponed or modified for weather, illness, competitions, equipment issues, insufficient supervision, venue restrictions, or other safety and scheduling conflicts. The adult representatives shall seek a mutually agreed rescheduled date; an unconfirmed replacement date is not a commitment.

Any fees, travel reimbursement, equipment transfer, insurance certificate, indemnity, promotional consideration or sponsor benefit must be separately disclosed and properly approved. Programs may be free or sponsored; no universal no-cost promise is made by this document.

7. Publicity and student media

Event names, descriptions, speaker information, photos, logos, and sponsor mentions require appropriate approval and any necessary third-party permission. Parents' NSF media permissions do not necessarily cover independent use by the host or another sponsor. The host should disclose its own photography or video practices before the event.

NSF will not provide private student, parent, health, or volunteer records merely for publicity. Any attendee contact collection must identify the collecting organization and relevant privacy practice.

8. Post-event summary and contact

Following the event, NSF may request aggregate attendance, participant feedback, and permission to share accurate non-identifying educational outcomes. The host should identify a contact for future events and address any lost equipment, incident, or post-event issue promptly.

Requests may be submitted through NSF's official contact page at https://sunke530-dev.github.io/robotexninjas/foundation-contact.html. This Guidelines document is general and does not substitute for the particular event confirmation or facility agreement.
